Bag Concrete

Challenges

Difficult to cast column starters with RMC supplied in transit mixers.

Solution

Bag Concrete comes to rescue with high quality concrete in easy to handle buckets / bags.

Key advantages:

- Quality assured ready-mixed concrete available in various grades.
- Available in small quantities.
- Can be safely transported to remote places.
- Speeds up construction work.
- Control on wastage.

Applications:

- Repair / renovation works in houses and buildings.
- Foundation of communication tower at roof.
- Small machine foundations.
- Small concrete works like sunken slabs, steps, pathways and precast members.
- Repair works of pavements, factory floors and drainage lines.
- Used for sill beam, lintel and loft.
